

ONE MORE
BIG REASON TO
DO BIG

Microsoft 365

The digital playing field has now been levelled thanks to technology. Businesses of all sizes have access to the same tools, and it is now fully possible for young, nimble teams to take on businesses twice or thrice their size. However, doing so requires them to leverage technology to enable better forms of work.

Challenges such as the setting up of remote working environments, securing vital business information against external threats and device-agnostic data accessing trends can be daunting for SMBs who are on the initial phases of their digital transformation journey.

For SMBs, the challenges were largely concerned with cost, security, and gearing up for remote work. A successful transition would have to be secure, affordable, and conducive to a remote/hybrid working environment. Enter Microsoft 365. Microsoft 365 is a full suite of productivity tools, now bundled together and priced attractively to ensure that all SMBs can simplify their internal processes, boost their productivity, and protect their valuable data against cybercriminals.

Key Differentiators of Microsoft 365

- 
 Work on popular office apps (Word, Power Point, Excel etc.) without any data loss or compatibility issues with your customer's, partner's or employee's windows system
- 
 Get more cloud storage for all users as even the base plan starts with 1TB of cloud storage and enterprise plan gives unlimited storage
- 
 Access email from industry leading and secure email client "Outlook"
- 
 No need to share email storage with user's file/cloud storage application
- 
 Get higher email space as even the base plan starts with 50GB of email space

Microsoft 365: Universal Toolkit for Teamwork

FAQs

Q1: What is Microsoft 365?

A1: Microsoft 365 is a line of subscription services which brings together best-in-class productivity apps with powerful cloud services, device management, and advanced security in one, connected experience.

Q2: What will I get in Microsoft 365 Apps for business?

A2: Desktop versions of Office apps: Access to Outlook, Word, Excel, PowerPoint, OneNote (Plus Access and Publisher for PC only), 1 TB of OneDrive cloud storage per user, 1 license for all Office apps on five mobile devices, five tablets, five PCs or Macs per user, as well as automatic updates

Q3: How can I activate the Microsoft 365 services?

A3: Check your activation mail from no-reply@appdirect.com which has your login details.

Q4: How to download, install, re-install Microsoft 365 or Office on a PC or MAC?

A4: Sign-in to your office account and download application.

Q5: Why should I use Microsoft Teams instead of any other conferencing tool in the market?

A5: Microsoft Teams is a collaboration tool designed to improve communication with web-conferencing features, robust chat service and file sharing. Syncing with Office Applications and services make collaboration seamless.
